

I oppose HR 4026. I pay monthly fees for my XM radio service because local broadcasters do not offer the programming that I need/want. Local traffic and weather broadcasts are a natural extension to this service. The NAB would rather stifle competition rather than change their way of doing business. XM Radio is my one-stop-shop for audio entertainment, news, and information when I am on the road. I have the right to this information and XM has the right (free speech!) to provide me with this information.

With NAB's attitude, I would think then that I, as a resident of New Jersey, would not be allowed to subscribe to an out of state newspaper.
